Wastewater Management Division  
Environmental Services Section***

CITY OF FRESNO - WASTEWATER MANAGEMENT  
POTW PRETREATMENT QUARTERLY REPORT  
2nd QUARTER 2010

NPDES Permit Holder or Sewer Authority Name:

City of Fresno

Report Date:

July 30, 2010

Period Covered by this Report:

April 1, 2010 to June 30, 2010

Period Covered by Previous Report:

January 1, 2010 to March 31, 2010

Name of Wastewater Treatment Plant

Reporting Program Number

Plant No. 1

5-01-254

Person to contact concerning information contained in this report:

Name:

Rosa Lau-Staggs

Title:

Chief of Wastewater Environmental  
Services

Mailing Address:

5607 West Jensen Avenue

Fresno, CA 93706-9458

Telephone Number:

(559) 621-5130

I certify under the penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

SUBMITTED BY:

Rosa Lau-Staggs  
Chief of Wastewater Environmental Services

7/29/10

Date

APPROVED BY:

Stephen A. Hogg  
Assistant Director of Public Utilities-  
Wastewater

7-29-10

Date

CITY OF FRESNO - WASTEWATER MANAGEMENT  
POTW PRETREATMENT QUARTERLY REPORT  
2<sup>nd</sup> QUARTER 2010

**Glossary of Acronyms**

AC	Achieved Compliance
CAC	Consistently Achieving Compliance
CDO	Cease and Desist Order
CMO	Compliance Order
CNO	Consent Order
ESS	Environmental Services Section
HWM	Hazardous Waste Manifest
IAC	Inconsistently Achieving Compliance
IU	Industrial User
NON	Notice of Noncompliance
NOV	Notice of Violation
PSES	Pretreatment Standards Existing Source
PSNS	Pretreatment Standards New Source
SIU	Significant Industrial User
SMR	Self-Monitoring Report
SNC	Significant Noncompliance
TRC	Technical Review Criteria
WN	Warning Notice

## SECOND QUARTER 2010 REPORT COMMENTS

The second quarter 2010 report includes a review of the enforcement and compliance samples for each Class I industry, a summary of the enforcement charges and administrative penalties, and a summary of the compliance status of each Significant Industrial User (SIU) who has been in violation of discharge limits or administrative requirements.

The compliance status terminology consists of Achieved Compliance, Consistently Achieving Compliance, Inconsistently Achieving Compliance, and Significant Noncompliance.

This terminology is defined as follows:

**Achieved Compliance** indicates that an industry successfully completed corrective actions for violations occurring during the previous quarter and was in 100% compliance during the reporting quarter.

**Consistently Achieving Compliance (CAC)** indicates that an industry was in 100% compliance during the reporting quarter.

**Inconsistently Achieving Compliance (IAC)** indicates that an industry was not in 100% compliance during the reporting quarter but did not meet the criteria of Significant Noncompliance.

**Significant Noncompliance (SNC)** as defined in CFR 403.8 is a compliance status in which the industry meets any of the following criteria:

- Violations of Wastewater Discharge Limits
  - a. Chronic Violations of wastewater discharge limits, defined here as those in which sixty-six percent (66%) or more of all of the measurements taken during a six-month period exceed (by any magnitude) the daily maximum limit or the average for the same pollutant parameter.
  - b. Technical Review Criteria (TRC) Violations, defined here as those in which thirty-three percent (33%) or more of all of the measurements for each pollutant parameter taken during a six-month period equal or exceed the product of the daily maximum limit or the average limit multiplied by the applicable TRC (TRC=1.4 for BOD, TSS, fats, oil and grease, and 1.2 for all other pollutants except pH.
  - c. Any other violation or violations of an effluent limit (average or daily maximum) that the Control Authority believes has caused, alone or in combination with other discharges, interference or pass through, or endangered the health of the POTW personnel or the general public.
  - d. Any discharge of a pollutant that has caused imminent endangerment to human health/welfare or to the environment and resulted in the POTW=s exercise of its emergency authority to halt or prevent such a discharge.
- Failure to meet, within ninety (90) days after the schedule date, a compliance schedule milestone contained in a local order for starting construction, completing construction, or attaining final compliance.
- Failure to provide reports within forty-five (45) days from the due date
- Failure to accurately report noncompliance.
- Any other violation or group of violations that the Control Authority considers being significant.

The City of Fresno realized a 90.2% discharge compliance rate for SIUs operating in this quarter, having thirty-seven out of forty-one discharging SIUs in compliance. For administrative parameters, a 90.2% compliance rate was realized.

Accordingly, staff issued one (1) Warning Notice, four (4) Notices of Violation, and two Notices of Noncompliance for discharge parameters, along with four (4) Warning Notices for administrative issues. Cost recovery charges for the quarter were \$1,597.50 in discharge enforcement charges, \$337.50 in administrative enforcement charges, and \$3,750 in penalties.

In addition to responding to violations, staff has a policy of communication to help SIUs identify and resolve problems before they escalate into a more serious situation. Consequently, there were forty-seven (47) Compliance Inspections and four (4) Enforcement Inspections, for a total of fifty-one (51) inspections conducted during the second quarter of 2010.

An adequate sampling program is also crucial in monitoring the rate of compliance and, subsequently, the effectiveness of a pretreatment program. In the second quarter of 2010, 314 samples were collected and analyzed for cyanide, total toxic organics, metals, oil and grease, and pH. A review of the data reveals that two (2) of the 15 samples (13.0%) of oil and grease were in violation, and one (1) of the one samples (6.2%) of metals was in violation.

In order to disseminate the latest information concerning the Pretreatment Program and other issues that might impact the industrial users, regular meetings are being held. These meetings are open to both significant and non-significant industrial users. The first meeting was held in March 2007 and occurs once in each calendar quarter. Topics cover any subject pertinent to the Pretreatment Program and have included the Pretreatment Streamlining Regulations and subsequent local municipal code amendments, local limits, pretreatment system technology, etc. Other areas of interest are also covered including rate increases that were adopted by the City Council and research into forming a special district that will be separate from the City of Fresno. Suggestions are also requested for future meetings.

The first quarterly meeting for calendar year 2010 occurred on 24 March 2010. The entire meeting was dedicated to recent changes to the wastewater discharge permit and monitoring requirements as a result of the recent Pretreatment Compliance Inspection.

The second quarterly meeting for calendar year 2010 was held on 30 June 2010. With the issue of salinity in the groundwater coming to the forefront, the entire meeting was spent discussing the latest update on a local limit for salts. This limit will be in a form that has yet to be determined but will be such that the industries will comprehend. During the meeting, available options for salinity control were discussed with direct feedback from the industries represented.

The City of Fresno and Fresno Metropolitan Flood Control District continue to work in mutual cooperation toward maintaining the Storm Water Program. Pretreatment Program inspections have incorporated Storm Water concerns. Each agency investigates complaints and reports of illegal discharges and will make referrals to the other agency when necessary.

The Third Quarter 2009 Report introduced the Fats, Oils, and Grease (FOG) Program, which began in July 2008. At the end of the second quarter 2010, a total of 386 Food Service

Establishments have been inspected and permitted. Inspections are planned to be conducted systematically to avoid overlap, however hot spot referrals from the Sewer Maintenance Division of either blocked lines or potential sanitary sewer overflows take highest priority. As of 1 July 2010, the Sewer Maintenance Division became part of the Wastewater Management Division as the Collection System Section. For the second quarter of 2010, the Collection System Section reported four cases for investigation. One case involved a solvent odor detected in the sewer line which was resolved with a site inspection and a discussion of Best Management Practices. The other three calls were the result of grease in the line from Food Service Establishments. Each case was investigated with preliminary solutions which will be followed up on in the future.

Keeping lines of communication open with the industrial users is always beneficial but a strong public education program is essential to support the Pretreatment Program. As such, the City of Fresno has allocated a substantial amount of funds to promote pollution prevention for the non-regulated dischargers. Previous reports highlighted the various aspects of the different public campaigns including the printed materials and media outreach specifically for the FOG Program and the Seriousness of Salt campaign. During the second quarter 2010, Wastewater Management staff had the opportunity to participate in and discuss pertinent issues at the Water Technology Conference on 10 May 2010, sponsored by California State University, Fresno, the annual Public Works Week Street Fair on 18 May 2010, and assist in a plant tour for school students and staff on 30 June 2010.

#### **Amendment to the First Quarter Report**

For the first quarter 2010, a slug discharge violation for California Dairies 15" Line was inadvertently left out. An amended status report is attached to the end of these comments.

**Industrial User  
Name & Address**

California Dairies 15" Line  
755 F St  
Fresno, CA 93706

**Industrial Type**

Dairy

**Flow Range of Process****Discharge (GPD)**

>500,000

**Regulating Codes**

Local: Fresno Municipal Code  
Federal: 40 CFR 403

Permit Number: FI(e)-58505

Previous Quarters Not In Compliance	Compliance Status	Discharge Violations				Corrective/Enforcement Actions Taken by IU and/or POTW This Quarter
		Parameter	Monitoring	Time Period	Reported Level	Limit Violated
0	Inconsistently Achieving Compliance	Slug discharge		03/11/10		
						See Remarks

Remarks: A Notice of Violation will be issued in the next quarter.

**City of Fresno - Wastewater Management Division**  
**Significant Industrial User List**

<b><u>Industry</u></b>	<b><u>Industry Type</u></b>
Ameripride Services	Industrial Laundry
Angelica Textile	Industrial Laundry
Ano-Tech Metal Finishing	Metal Finisher
Aramark	Industrial Laundry
Beef Packers, Inc.	Slaughter House
California Dairies, Inc.	Dairy
California State University, Fresno	State University
Commercial Electro Plating	Metal Finisher
Community Medical Center – Clovis	Hospital
Conagra Foods	Food Processor
Cornnuts	Food Processor
Darling International, Inc.	Rendering
E. & J. Gallo Winery	Winery
